TABLES FOR INDIVIDUAL STATES

The statistics for each State are presented in a series of 14 standard tables. The subjects covered by the State tables are indicated by the list of titles immediately following, and the page on which each table is to be found for any given State in this volume is shown in the tabular index below.

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE

Table

1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.
2. All classes by race, age, and sex.
3. All classes by occupational group, race, age, and sex.
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.
8. All classes by sex and industry group.

TABLES FOR COUNTIES

9. All classes by race, sex, and residence, with 1930 population.
11. All classes by age and sex.
13. All classes by occupational group and sex.

TABLES FOR CITIES OF 10,000 OR MORE

10. All classes by race and sex, with 1930 population.
12. All classes by age and sex.
14. All classes by occupational group and sex.

INTRODUCTION

The National Unemployment Census was taken in conformity with an Act of Congress (Pub. No. 409, 75th Cong.) approved August 30, 1937. This Act directed the President to take, on or before April 1, 1938, "... a census of partial and total unemployment and occupations, and including such other related information as shall be deemed in the public interest in the 48 States, the District of Columbia, and the Territories of Hawaii and Alaska."

This census was to provide information "... to aid in the formulation of a program for reemployment, social security, and unemployment relief for the people of the United States ..."

The Act provided that the furnishing of information should be voluntary, that the administering agency could call on other departments or agencies of the Federal Government for information relating to, and for assistance in connection with, the census, and that the President should make such rules and regulations as might be necessary to carry out the provisions of the Act.

A temporary organization under John D. Biggers, Administrator, was created to take the census. This organization performed the general services of planning, public information, and administration. It utilized the services of existing Federal agencies, especially the Post Office Department, the Bureau of the Census in the Department of Commerce, the Division of Accounts and Deposits of the Treasury Department, and the Central Statistical Board.

The main feature of this Unemployment Census was a voluntary registration of totally unemployed and partly unemployed persons and of persons on emergency work, effected through the use of a simple schedule designated the Unemployment Report Card. The official registration period extended from November 16 to November 20, 1937.

General plan of reports.—A preliminary count for the United States as a whole of persons who registered in the Unemployment Census was released on January 2, 1938. Preliminary figures for States, counties, and cities of 10,000 or more giving the basic classification by sex and by registration class were published in a preliminary report issued January 18.

The final reports of the Unemployment Census present the results of the detailed mechanical tabulations classifying all registrants further by age, race, occupation, industry, etc. These final tabulations have been published in a series of State bulletins in which the figures are presented for the State as a whole, for each city of 100,000 or more, and in somewhat less detail for all counties and all cities of 10,000 or more. These bulletins, bound in volumes with the summary report for the United States and a supplemental report on geographic divisions, form the major part of the final report of the census.

The contents of the three volumes made up of these bulletins are as follows:

Volume I.—United States Summary, Geographic Divisions, and States from Alabama to Indiana.

Volume II.—States from Iowa to New York.

Volume III.—States from North Carolina to Wyoming, Alaska, and Hawaii.

The unemployment report card.—As directed by the Act of Congress providing for this census, the schedule used to secure the data, which is designated the Unemployment Report Card, was made up by a committee composed of the Secretary of Commerce, the Secretary of Labor, the Works Progress Administrator, the Chairman of the Social Security Board, the Chairman of the Central Statistical Board, and the Director of the Census. This committee consulted with the Administrator of the Unemployment Census on general administrative questions, but had the sole responsibility for determining the scope and contents of the Report Card. A facsimile of this card is presented on page x.

Publicity.—Because of the importance of securing a complete and accurate voluntary registration of the unemployed and partly unemployed, every effort was made to give wide publicity to this undertaking. The Mayors of more than 9,600 cities and towns throughout the United States appointed Citizens' Committees representing various interests in their communities to collaborate with the postmaster and give whatever assistance was possible to assure a complete registration. These committees provided publicity, furnished speakers at special meetings, created special subcommittees to deal with certain phases of the registration, and in many other ways supplemented the national publicity campaign.

Collection of data.—The facilities of the Post Office Department were made available for the distribution, collection, and local checking of the data. Post Office employees received special instructions concerning the census from the Postmaster General.

The Unemployment Report Cards were distributed on November 16, 1937, to dwellings throughout the United States and the Territories of Hawaii and Alaska. Each postal carrier or other employee distributing the Report Cards left at least one card at each dwelling, and more if he had reason to believe that two or more unemployed workers lived there. Additional cards were available at all post offices and from all carriers during the registration period from November 16 to November 20. Assistance in filling out the report cards was obtainable from carriers and at all post offices.

Cards filled out by persons who wished to register were mailed to the National Unemployment Census, in care of the local postmaster. Nonresident registrations were at once forwarded to the post office of residence. Thus, if a resident of Detroit registered while visiting in Cleveland, his card was forwarded to the Detroit post office. Registration cards from CCC camps were forwarded to the place of residence of the enrollees.¹

¹ Special overprinted cards were used for enrollees in CCC camps. These cards were sent by the Civilian Conservation Corps to all camps in advance of the regular registration. In order to assure as complete a voluntary registration as possible of persons employed on emergency projects, and to provide some additional statistical data for the Works Progress Administration, a special WPA check card was filled out by each project supervisor for all emergency workers on his project. These cards were then sent to the local post office for checking with registrations, and were then forwarded to Washington.

Registration cards were checked for completeness of entry by clerks in the local post offices, and in the majority of cases where the registration cards were inadequately or improperly filled out they were taken back to the registrant by the carrier or by a special "contact" employee for correction or completion. (See Post Office Instructions, Appendix A, Sections 29-31.)

All cards received by post offices on or before November 21 were sorted as if for local mail delivery, and duplicate or questionable cards were so indicated by the regular carrier who served each given address. All Report Cards (including duplicate and questionable cards) were then forwarded by the local post office to the National Unemployment Census in Washington for tabulation.

Tabulation of data.—This voluntary registration presents statistical problems somewhat different from those of an enumerative census, but the office procedures were quite parallel. The facilities of the Bureau of the Census were utilized in the editing, coding, tabulating, and preparing of data for publication. Experienced employees of this Bureau selected, trained, and supervised a temporary staff of approximately 1,700 employees engaged in this phase of the work. This staff completed the initial editing, classifying, and counting of nearly 12,000,000 Report Cards in less than six weeks from the end of the registration period.

Census tabulating equipment, developed for the compilation of the decennial population census, was used to tabulate punch cards bearing information given on the Report Cards. Tables for the final reports were typewritten on printed forms prepared by the Bureau for offset printing, and the map in each final report was also prepared by the Bureau.

The enumerative check of selected areas.—In order to learn the variation between the number of unemployed who voluntarily returned Unemployment Report Cards and the number who would have been reported by an enumerative type census, a door-to-door canvass was conducted by postal carriers in selected areas immediately after the voluntary registration. The results of this check census of 1,640 well-distributed postal routes are presented in Volume IV of this report.

All data in Volumes I, II, and III of this report and in all State reports are from the voluntary registration, as indicated by the phrase "Persons Who Registered in the Unemployment Census" which appears in the title of each table.

Population data.—In Table 1 and Table 9 are presented general population data from the last decennial census, April 1, 1930. These figures facilitate comparisons between States, cities, and counties. A footnote on Table 1 gives the estimated total population of each State for July 1, 1937, prepared by the Bureau of the Census.

The seven and one-half years between the 1930 census of population and the 1937 Unemployment Census has been a period of considerable population change in this country. Some communities which

are dependent upon industries seriously affected by the depression or which have suffered severe droughts have lost in population. The 1930 population data, therefore, do not provide an entirely satisfactory base for rates and ratios of the unemployed for purposes of this census, but they are the only data of this kind available.

General population data are given by color or race in Table 1. In 1930 persons of mixed blood born in Mexico or of Mexican parentage were classified by the Bureau of the Census as Mexicans and formed a part of the class designated "other races." For the purposes of the Unemployment Census it was not feasible to provide a separate classification for Mexicans. Postal employees and local persons assisting in the registration were instructed to classify all Mexicans as "white." This is in keeping with the present practice of the Bureau of the Census. The absence of a direct statement on the Report Card instructing Mexicans to check "white" may have resulted in the registration of some Mexicans in the "other races" group. No adjustment has been made in the 1930 population figures presented in this report for the change in the classification of Mexicans.

Tabulation areas.—The tabulations of the Unemployment Census data may be divided into two main groups: First, those made for all counties and all urban places of 10,000 or more; and, second, those made for individual cities of 100,000 or more, for cities of 10,000 to 100,000 as a group for each State, and for the remainder of the State. Any tabulation presented for a State as a whole is therefore available also for each city of 100,000 or more; for the group of smaller cities indicated above; and for the remainder of the State—designated in the tables "Cities under 10,000 and rural areas." The tables in the United States reports are consolidations of these tabulations for smaller areas.

Because of the difficulties of geographic allocation already referred to, it was not found practicable to make a tabulation of the persons registering in this census for the entire urban area as defined by the Census (comprising incorporated places of 2,500 or more) or for the rural area. However, the general plan of tabulation and presentation of data gives "urban" and "rural" unemployment figures based upon an "urban" classification of places having 10,000 or more inhabitants in 1930.

DEFINITION OF TERMS

Totally unemployed.—Under this classification are found all persons who registered as "Totally unemployed and wanting work," that is, those who checked Section (a) of Question 2 on the Report Card. In addition, this class includes some persons who checked both Section (a) and Section (b) of Question 2, but who indicated in answer to Question 7 that they had not worked during the previous week.

Emergency workers.—This class is made up mainly of persons who checked Section (c) only under Question 2 on the Report Card: "Working at

WPA, NYA, CCC, or other emergency work." It includes appreciable numbers, however, of persons who checked Section (a) or Section (b) also, in addition to Section (c). These doubled-checked cases were all classified as emergency workers because employment on WPA, etc., seemed to be a more tangible and definite concept than total or partial unemployment, and because employees of the Works Progress Administration had been told to consider themselves as unemployed for purposes of this census. On the other hand, some persons on emergency projects were not fully employed on the projects and might properly register as partly employed on emergency work.

Unemployed, including emergency workers.—Those persons who registered as "totally unemployed" and those who registered as "emergency workers" may be considered as a single class for general purposes where one summary figure on the "unemployed" is desired. This combined class corresponds approximately to the definition of "unemployment" used in unemployment estimates. In recognition of this, these two registration classes have been added together into a single group designated "unemployed, including emergency workers," in Table 1 for each State.

In making comparisons of unemployed persons by sex it is particularly advisable to combine the totally unemployed and the emergency workers. In normal families consisting of a husband, wife, and children it is the practice of emergency agencies to provide employment for the husband alone unless he is disabled or not able to perform the type of work available. This selection results in the inclusion of a much larger proportion of males than of females among the emergency workers. The women in such families may be quite as "unemployed" as the men, but because they have been classified as secondary workers and were not on emergency projects at the time of the registration, they registered as totally unemployed, if at all. Thus, the combining of the two classes—those registered as totally unemployed and those registered as emergency workers—into a single class, provides a count of workers presumably available for private employment and eliminates the effect of emergency work programs on the apparent sex distribution of the unemployed.

Partly unemployed.—This class includes all persons who registered as "Partly employed and wanting more work," that is, those who checked the answer to Section (b) of Question 2, or who checked both Sections (a) and (b) but indicated under Question 7 some hours worked the preceding week.

Significance of the classification.—There are several logical distinctions between these classes. The partly unemployed and the emergency workers are engaged in some form of gainful activity, while the totally unemployed are not. The partly unemployed and the emergency workers receive some payment for their services. On the other hand, most emergency workers would in all probability be among the totally unemployed, except for the emergency work programs which have been substituted for direct relief in this country.

The partly unemployed should not be added to the totally unemployed and the emergency workers in any instance where the entire number of persons who are usually considered unemployed is desired. Many persons are normally in the class of the partly employed who do *not* want additional work. The distinction between the partly employed and the partly unemployed lies entirely in the needs and desires for more employment. In no case in this report are the partly unemployed added to either the emergency workers or the totally unemployed.

Age and ability qualification.—The data in this report are from those registrations submitted by persons from 15 to 74 years of age who reported that they were able to work. In keeping with the main purposes of the census to show the characteristics and distribution of the employable unemployed, all persons who indicated, in answer to Question 3 on the Report Card, that they were not able to work were excluded from the tabulations. For the same reason it was deemed advisable to exclude from tabulations the relatively small number of registrations of persons under 15 years of age and 75 years of age and over.

Farm residence.—A classification of registrants by sex, class, and farm residence is presented in Table 4. Postmasters and carriers supplied this information if it was not given by the registrant. No definition of a farm was given on the schedule. This may have resulted in some variation between the classification of persons in the Unemployment Census and that given in the 1930 Census of Population or the 1935 Census of Agriculture.

Other workers in the family.—Question 11 on the Report Card was "How many other workers are there in your family living in the same household with you?" The results of this inquiry are presented in Table 4. Some duplication between persons who registered and those reported as "other workers" is apparent and proper. Where two or more workers in a family were unemployed and registered, each would report the other. The data for single-worker households, that is, cases with no other workers, are of special economic and social significance.

Dependents.—A classification of all registrants by number of dependents reported in answer to Question 13 on the Report Card is also given in Table 4. In addition to minor children, aged parents, and others usually reported as dependents (for example, for purposes of taxation), registrants in this census properly reported wives and some unemployed adult members of their families. Also, two or more unemployed workers in a family quite properly reported their joint dependents. It is not statistically valid, therefore, to add the total number of dependents reported in order to get the total number of individuals dependent upon unemployed, or partly unemployed, persons in any area.

Weeks worked last year.—Each registrant was asked to report on the number of weeks worked during the 12 months preceding the registration—Question 8 on the Report Card. It should not be assumed

that the number of weeks worked reported in answer to this question always represents full-time weeks. It is probable that in many instances the registrants worked only part time during the weeks reported. Because of the exclusion by definition on the Report Card of time spent on WPA, NYA, CCC, and other emergency work, no tabulations are presented on this subject for emergency workers.

Income.—A classification of registrants by amount of income reported for the week of November 7 to 13, 1937, is presented in Table 5 for persons who registered as totally unemployed and as partly unemployed. No report is made on the income of persons in the "emergency worker" class, because by a definition on the schedule relief payments and wages from work relief were not considered income for purposes of this census. There are two major reasons for the reporting of income by totally unemployed persons: (a) Some persons who registered as totally unemployed between November 16 and November 20 had been employed during the week of November 7 to 13, and (b) all receipts from rent, gifts, and other sources not related to immediate employment were included in the income reported.

Hours worked last week.—Table 7 presents the data on the number of hours worked during the week of November 7 to 13, 1937, for persons who were partly unemployed. This class includes some persons who were seasonally unemployed, some who worked regularly but on reduced hours, and some casual laborers. Although the data are tabulated in intervals of eight hours, or the equivalent of full-time employment, a registrant reporting eight hours worked during the week in question may have worked either one whole day or for a few hours on each of several days.

Occupational groups.—The specific occupations returned on the Unemployment Report Cards have been classified into nine major social-economic occupational groups. This classification, prepared by the Bureau of the Census, recognizes gradations of economic function as well as of skill. The nine specific groups, together with the principal occupational designations included in each are presented on page IX. The occupational designations in this list are those used in the classification of gainful workers in the decennial census of 1930.

A bulletin showing the composition and characteristics of gainful workers classified into social-economic groups has been published by the Bureau of the Census.² This bulletin gives the 1930 census data for the United States, each State, and each city of 500,000 or more and for each industry.

² Bureau of the Census, U. S. Department of Commerce, *A Social-economic Grouping of Gainful Workers of the United States, 1930*; by Alba M. Edwards; Washington: 1938.

A six-group classification which shows more sharply gradations of skill and function can be obtained by adding farmers to proprietors, managers, and officials and adding the three unskilled-worker groups, farm laborers, other laborers, and servant classes. The group designated "servant classes" should not be confused with what are ordinarily spoken of as domestic and personal service employees; only the unskilled persons engaged in domestic and personal service are included in the "servant classes."

Where two or more occupations or industries were given on the Report Card, the registrant was classified in accordance with the first entry.

New workers.—Under this designation are found first-job seekers, persons who have not acquired a regular occupation, and persons seeking to reenter the labor market after a period of nongainful activity, such as housework in their own home. For all these registrants the entry "new worker" on the Report Card took the place of the entry of a specific occupation and industry. Where both an entry of "new worker" and an occupation were given on the Report Card, the registrant was classified in accordance with the occupation reported and not as a "new worker." For convenience in presentation, the age, sex, class, and race of new workers are shown in the standard occupational tables Nos. 3, 13, and 14. New workers are excluded from all industry tables.

Of all persons who registered as "new workers," first-job seekers comprised probably the major part of those under 25 years of age, particularly those in the 15-19-year age group (see Table 3). New workers 25 years of age and over consist principally of those who are seeking to reenter the labor market or to acquire gainful employment. (See instructions accompanying Question 9 on the Unemployment Report Card.)

Industry groups.—All registrants were classified in accordance with the industry groups indicated in Table 8. In each instance these groups are comparable with those used in the 1930 census of population.

This classification is based upon information given by individuals rather than information given by the employers. In most instances, the industry given on the Report Card is that in which the individual worked when engaged in his usual occupation. Exceptions to this general rule are found in the case of some of the emergency workers. Emergency workers acquire skill in particular industries while working on the works projects and therefore tend to concentrate in those industries which are paralleled by work done on emergency programs.

SPECIFIC OCCUPATIONS IN EACH OCCUPATIONAL GROUP

Professional Persons

Actors and showmen
Architects
Artists, sculptors, and teachers of art.
Authors, editors, and reporters
Chemists, assayers, and metallurgists.
Clergymen
College presidents and professors
Dentists
Designers, draftsmen, and inventors
Lawyers, judges, and justices
Musicians and teachers of music
Osteopaths
Photographers
Physicians and surgeons
Teachers
Technical engineers
Trained nurses
Veterinary surgeons
Other professional pursuits
Chiropractors
Healers (not elsewhere classified)
Religious workers

Farmers (Owners and Tenants)

Proprietors, Managers, and Officials (except Farmers)

Foresters, forest rangers, and timber cruisers
Owners and managers of log and timber camps
Operators, managers, and officials—extraction of minerals
Builders and building contractors
Manufacturers
Managers and officials—manufacturing
Captains, masters, mates, and pilots
Garage owners, managers, and officials
Owners and managers—truck, transfer, and cab companies
Conductors—steam railroad
Officials and superintendents—steam and street railroads
Postmasters
Proprietors, managers, and officials—transportation
Bankers, brokers, and money lenders
Managers and officials—insurance companies
Proprietors, managers, and officials—trade
Managers and officials—real estate companies
Retail dealers
Wholesale dealers, importers, and exporters
Undertakers
Officials and inspectors—city and county
Officials and inspectors—State and United States
Billiard room, dance hall, etc., keepers
Directors, managers, and officials—motion-picture production
Keepers of charitable and penal institutions
Keepers of pleasure resorts, race tracks, etc.
Radio announcers, directors, managers, etc.
Theatrical owners, managers, and officials
Owners and proprietors—cleaning, dyeing, and pressing shops
Managers and officials—cleaning, dyeing, and pressing shops
Hotel keepers and managers
Laundry owners, managers, and officials
Restaurant, café, and lunchroom keepers

Clerks and Kindred Workers

Inspectors, scalers, and surveyors—log and timber camps
Baggagemen and freight agents—railroad
Ticket and station agents—railroad
Agents—express companies
Express messengers and railway mail clerks
Mail carriers
Radio operators
Telegraph messengers
Telegraph operators
Telephone operators
Advertising agents
Clerks in stores
Commercial travelers
Decorators, drapers, and window dressers
Inspectors, gaugers, and samplers—trade

Clerks and Kindred Workers—Con.

Insurance agents
Newsboys
Real estate agents
Salesmen and saleswomen
Abstractors, notaries, and justices of peace
Architects', designers', and draftsmen's apprentices
Apprentices to other professional persons
Officials of lodges, societies, etc.
Technicians and laboratory assistants
Dentists' assistants and attendants
Librarians' assistants and attendants
Physicians' and surgeons' attendants
Agents, collectors, and credit men
Bookkeepers, cashiers, and accountants
Clerks (except clerks in stores)
Messenger, errand, and office boys and girls
Stenographers and typists

Skilled Workers and Foremen

Farm managers and foremen
Foremen—log and timber camps
Foremen, overseers, and inspectors—extraction of minerals
Blacksmiths, forgemen, and hammermen
Boilermakers
Brick and stone masons and tile layers
Cabinetmakers
Carpenters
Compositors, linotypers, and typesetters
Coopers
Electricians
Electrotypers, stereotypers, and lithographers
Engineers (stationary), cranimen, hoistmen, etc.
Engravers
Foremen and overseers—manufacturing
Puddlers
Glass blowers
Jewelers, watchmakers, goldsmiths, and silversmiths
Loom fixers
Machinists, millwrights, and toolmakers
Mechanics¹
Millers (grain, flour, feed, etc.)
Molders, founders, and casters (metal)
Painters, glaziers, and varnishers (building)
Paper hangers
Pattern and model makers
Piano and organ tuners
Plasterers and cement finishers
Plumbers and gas and steam fitters
Pressmen and plate printers (printing)
Rollers and roll hands (metal)
Roofers and slaters
Sawyers
Shoemakers and cobblers (not in factory)
Skilled occupations (not elsewhere classified)
Stonecutters
Structural iron workers (building)
Tailors and tailoresses
Tinsmiths and coppersmiths
Upholsterers
Bus conductors
Conductors—street railroad
Foremen and overseers—steam and street railroads
Locomotive engineers
Locomotive firemen
Aviators
Foremen and overseers—transportation
Inspectors—transportation
Floorwalkers, foremen, and overseers—trade
Firemen—fire department
Marshals, sheriffs, detectives, etc.
Policemen
Foremen and overseers—cleaning, dyeing, and pressing shops
Foremen and overseers—laundries

Semiskilled Workers

Apprentices to building and hand trades
Apprentices (except to building and hand trades)—manufacturing
Bakers
Dressmakers and seamstresses (not in factory)
Dyers

Semiskilled Workers—Con.

Filers, grinders, buffers, and polishers (metal)
Milliners and millinery dealers
Oilers of machinery
Enamelers, lacquerers, and japanners
Painters, glaziers, and varnishers (factory)
Operatives—manufacturing
Boatmen, canal men, and lock keepers
Sailors and deck hands
Chauffeurs and truck and tractor drivers
Boiler washers and engine hostlers
Brakemen—steam railroad
Motormen—steam and street railroads
Switchmen, flagmen, and yardmen—steam and street railroads
Telegraph and telephone linemen
Apprentices—transportation
Other occupations—transportation
Apprentices—wholesale and retail trade
Deliverymen—bakeries and stores
Other pursuits in trade
Guards, watchmen, and doorkeepers
Soldiers, sailors, and marines
Other public-service pursuits
Other occupations—professional service
Attendants—pool rooms, bowling alleys, golf clubs, etc.
Helpers—motion-picture production
Theater ushers
Other attendants and helpers—professional service
Barbers, hairdressers, and manicurists
Boarding and lodging house keepers
Other operatives—cleaning, dyeing, and pressing shops
Housekeepers and stewards
Deliverymen—laundries
Other operatives—laundries
Midwives and nurses (not trained)
Other pursuits—domestic and personal service

Farm Laborers

Other Laborers

Fishermen and oystermen
Teamsters and haulers—log and timber camps
Other lumbermen, raftsmen, and woodchoppers

Laborers in coal and lumber yards, warehouse, etc.
Laborers, porters, and helpers in stores
Laborers—public service
Laborers—professional service
Laborers—recreation and amusement
Stage hands and circus helpers
Laborers—cleaning, dyeing, and pressing shops
Laborers—domestic and personal service
Laborers—laundries

Servant Classes

Boothblacks
Charwomen and cleaners
Elevator tenders
Janitors and sextons
Launderers and laundresses (not in laundry)
Porters (except in stores)
Servants
Waiters

¹ Not otherwise specified.

UNEMPLOYMENT CENSUS, 1937

FACSIMILE OF THE SCHEDULE SIDE OF THE UNEMPLOYMENT REPORT CARD

UNEMPLOYMENT REPORT CARD

Please fill out this card if you are totally or partly unemployed

Answer all questions promptly

It is important that EVERY totally or partly unemployed worker in your household fill out a SEPARATE report card. Additional cards can be secured from your postman or post office. You can get help in answering these questions, if you need it, at any post office or from any postal employee.

1. Print full name.....
 Print full address.....
 (First) (Middle) (Last) (Street and number or R. F. D.) (City, town, or village) (County) (State)

2. Are you: (Check only one)
 (a) Totally unemployed and want work? ☐
 (b) Partly employed and want more work? ☐
 (c) Working at WPA, NYA, CCC, or other emergency work? ☐

3. Are you able to work? (Check one) Yes ☐ No ☐

4. Age at last birthday..... years

5. Color }
 or race } (Check one) White ☐ Negro ☐ Other ☐

6. Sex (Check) Male ☐ Female ☐

7. How many hours did you work last week? _____ hours
 (If none, write "None")
 Enter total number of hours worked at ALL jobs (except WPA, NYA, CCC, or other emergency work) during the week from Sunday, November 7, through Saturday, November 13.

8. How many weeks did you work in the last 12 months? _____ weeks
 (If none, write "None")
 Enter total number of weeks worked at ALL jobs (except WPA, NYA, CCC, or other emergency work) during the 12 months from November 1, 1936, through October 1937.

9. What is your occupation, or kind of work?
 (Examples: Tool maker, waitress, watchman, farm laborer, etc.)
 The occupation which you give in answer to this question (number 9) describes the work you do. The answer to the next question (number 10) describes the kind of business or industry in which the work is done. Enter "New worker" in both questions 9 and 10 if you have never had a steady job, and want work. Do not give the name of your company or employer as an answer to question 10.

10. Kind of business or industry in which you did, or are doing, this kind of work?
 (Examples: Machine shop, restaurant, railroad, cotton farm, etc.)

11. How many other workers are there in your family living in the same household with you? _____ workers
 Count all persons working for pay or profit, or wanting work, except yourself.

12. How many of these workers are: (a) Totally unemployed and want work? _____ workers
 (b) Partly employed and want more work? _____ workers
 (c) Working at WPA, NYA, CCC, or other emergency work? _____ workers

Note.—Every totally or partly unemployed worker in your family should make out and return a separate report card.

13. How many persons are mainly dependent on you for support? (Do not count yourself) _____ dependents

14. What was your individual total income, cash and other, last week? \$ _____
 Do not include payments from relief, WPA, NYA, CCC, or other emergency work.

11-11911

Mail this card before midnight November 20, 1937. No postage stamp is needed

FACSIMILE OF THE MESSAGE OF THE PRESIDENT WHICH APPEARED ON THE ADDRESS SIDE OF THE UNEMPLOYMENT REPORT CARD

A MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

THE WHITE HOUSE
 WASHINGTON

TO EVERY WORKER:

If you are unemployed or partly unemployed and are able to work and are seeking work, please fill out this report card *right away* and mail it before midnight, Saturday, November 20, 1937. No postage stamp is needed.

The Congress directed me to take this census. It is important to the unemployed and to everyone in this land that the census be complete, honest, and accurate. If you give me the facts I shall try to use them for the benefit of all who need and want work and do not now have it.

IOWA

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	219
2. All classes by race, age, and sex.....	221
3. All classes by occupational group, race, age, and sex.....	227
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	239
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	241
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	243
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	247
8. All classes by sex and industry group.....	248
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	260
11. All classes by age and sex.....	264
13. All classes by occupational group and sex.....	270
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	261
12. All classes by age and sex.....	265
14. All classes by occupational group and sex.....	271

Map of the State.....	Page 644
TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	645
2. All classes by race, age, and sex	648
3. All classes by occupational group, race, age, and sex	656
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	671
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	674
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	676
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	681
8. All classes by sex and industry group.....	682
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	697
11. All classes by age and sex.....	704
13. All classes by occupational group and sex.....	713
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	701
12. All classes by age and sex.....	708
14. All classes by occupational group and sex.....	717
